

Our BEST Wildlife Officer to be Transferred to Shelter Duty Your Voice Counts!

Gregory Randall has been our ever-present professional Wildlife resource in the Hollywood Hills. He has no doubt attended many meetings of our organizations to give educational presentations. He has always answered calls and emails regarding neighborhood concerns about co-existing with wildlife.

He is now being told that he will be transferred to East Valley Animal Shelter as an Animal Control Officer. This shift would leave us without a trained and experienced Urban Wildlife Officer to meet the growing needs of the community in the hills. It's time to ask the City and the Animal Services Commission to change their minds. Please write a letter now - this is really important!

Tell them that a grave mistake is taking place. Let them know that you are in support of Officer Gregory Randall being restored to his position as Wildlife Specialist for the Los Angeles Animal Services.

It would be good to recommend that Gregory Randall Wildlife Specialist be given charge of the Wildlife Program since he has demonstrated compassion and leadership regarding wildlife and human encounters. His work with hillside neighborhoods has improved the way we view wildlife by reducing vilification through education and hard work. He should not be removed from the Urban Wildlife Program this close to his official retirement date some five years down the road. This wrong-headed shift will make it impossible for him to continue doing the Urban Wildlife consulting work educating people and caring for wildlife - his life's ambition!

Send your letter to our 4th District Councilmember, Tom Labonge **Tom.Labonge@lacity.org** and the Councilmember for the 13th District, Mitch O'Farrell, **councilmember.ofarrell@lacity.org**

Please include The Los Angeles Animal Services Commissioners in your email:
