LOS ANGELES POLICE DEPARTMENT

Operations-West Bureau

Emergency Preparedness Neighborhood Assets Program (EPNAP)

The purpose of this program is to partner with our local communities in identifying neighborhood resources/assets, within the geographic borders of Operations-West Bureau (OWB), which can be utilized by first responders during a disaster. These neighborhood resources/assets will serve as a backup supply in the event police/fire personnel are cut off from access to City supplies.

During and immediately following a disaster, there is the potential for interrupted police/fire services due to power outages. This loss of power can cause emergency communication services to become temporarily inoperable. Additionally, structural damage to police/fire facilities can hinder the ability of police/fire personnel to respond to calls for service when the need is greatest.

In preparation for this scenario, we are seeking anyone or anything that would be useful to police/fire personnel in responding to or recovering from a disaster. Our ultimate goal is to ensure normal emergency operation services during any type of disaster.

Below is a signup sheet for community members who are willing to provide OWB with resources/assets that will assist with police/fire operations during a disaster. Examples of key neighborhood assets would be:

- Food, Water & Emergency Medical Supplies
- Batteries & Generators
- Radios & Radio Equipment
- Tents / Moveable Covered Structures
- Trucks / Pick-Up Truck / Construction Vehicles
- Construction Equipment
